Education

Bachelor of Science: Department of Biology – 2015, University of Duhok, Iraq

Master of Science: Department of Molecular Biology and Genetics – 2019, University of Van Yuzuncu Yil University, Van, Turkey

Thesis title: Determination of Hepatoprotective and Antioxidant Role of Thyme (*Origanum onites* L.) Infusion against Ethyl Alcohol Induced Oxidative Stress in Rats

Brief description of thesis: We worked on alcohol (EtOH) induced oxidative stress in rats then we used thyme (*Origanum onites* L.) derived infusion as an antioxidant and hepatoprotective agent and we concluded that *O. onites* contents may have a hepatoprotective and antioxidant role against EtOH induced oxidative stress in rats.

Work experience

September 5, 2018 – November 9, 2018: Biochemistry Laboratory of Van Yüzüncü Yil University Dursun Odabaş Medical Center, Van, Turkey

September 1, 2021 – till now: Assistant Lecturer at Medical Laboratory Department, Cihan University Duhok, Duhok, Kurdistan region\Iraq

Taught Subjects

Human Physiology

General Biology

Skills

Computer programs (MS Office)

Computer operating Systems (Windows)
