Objective and Experience:

- Assistant Professor Anatomist
- M.B.Ch.B.(bachelor medicine and surgery) Baghdad University College of Medicine 2001.
- MSc Anatomy Tikrit University. College of Medicine 2009.
- PhD Anatomy Tikrit University. College of Medicine 2013.
- Instructor of Anatomy department 2013-2016.
- Head of Anatomy department Al-Iraqia University college of medicine 2016 - 2021.
- Instructor of Examination committee College of medicine 2018-2021.
- Assistant Prof. in Anatomy department Baghdad University / college of medicine till now.
- Member of Iraqi medical association 2001 till now.
- Member of Iraqi academic association 2018 till now.

Experience:

- ❖ House officer:2001 – 2003.
- ❖ Senior house officer: 2003-2005.

Academic:

- ❖ Assistant lecturer 2009-2013
- ❖ Lecturer in different subjects in Anatomy, Histology, and Embryology 2013-2016
- ❖ Assistant professor in Anatomy and Biology department 2016 till now with wide experience in teaching in Anatomy, Histology, Embryology and Histological Techniques both academic and clinical.

MSc thesis

- The placenta, Anatomical and Histological correlations with maternal age, babies' weight and gender

PhD thesis

- The human cerebral cortex thickness (left superior temporal gyrus), anatomical, histological and magnetic resonance study imaging.

Research skills:

- ❖ Extensive skill in Microsoft office. internet.
- ❖ Practical skill in the Remark office OMR program (electronic Optical Mark Recognition)
- ❖ Excellent printing abilities and Text editing.
- ❖ Fluent in Arabic and English languages.

Publications:

- 9 Anatomical and Histological papers published inside Iraq.
- Electron microscope study of human cerebral cortex (left superior temporal gyrus) in different age groups and gender.
- Human cerebellum measurements in middle age males and females: an MRI based morphometric study.
- Carnal dimorphism of femur distal extremity.
- Anatomical differences of cerebellar vermis measurements values in healthy adults men and women using MRI images.
- Inclination of the lumbosacral angle in normal individual an MRI study.
- Anatomical and histological features of placenta in different age groups.
- Ultrasonographical and doppler study of human placenta of different maternal age groups.
- Pathological evaluation of thyroidectomy specimens in patients with apparently single thyroid mass.
- Refined radio-anatomical lumber level of iliac crest attic
- 2 Medical education papers published in UK.

Activity:

- Member of undergraduate Examination committee for 3 years
- Member of postgraduate Examination committee with 6 MSc thesis committee in different Universities in Anatomy
- Asst. prof. lecturer and examiner in Dentistry college – Ibn Sina University of Medical and Pharmaceutical Sciences during the academic year 2020-2021,2021-2022.
- Assist. Prof. in Cihan University, College of Health Sciences Medical Laboratory Department Duhok Kurdistan Iraq 2022-2023.
